

1. DEGREES OFFERED AND PROGRAM APPROVAL PROCEDURES

EC 11/17/66; FGS 4/27/70; VP 10/1/70

A department anticipating the development of a new program of study leading to a degree already approved for the department will normally clear with all administrative personnel concerned with such matters, will petition the Graduate Board in accordance with established procedures and will provide a statement of how the new program is to be supported academically. This statement will normally be a brief outline of the course of study involved in the program.

The procedure for approval of new programs is outlined in New Program Proposal Procedures and Deadlines and may be obtained from the Executive Vice President and Provost's office.

1.1 Doctoral Programs

FGS 5/17/56, 12/18/68

The doctoral degree is given primarily for high attainment in some special field of scholarship and for demonstrated ability for independent research in a subdivision of this field, not merely for courses completed or time spent in study. The doctoral student's program committee is responsible for developing a course of study and dissertation research to assure this attainment.

1.1.1 Approval of Department to Offer Program Leading to a Doctoral Degree

FGS 5/17/56, 1/18/57, 1/6/66, 4/27/70; VP 10/1/70; AFFIRM 7/1/97

A request for approval to a doctoral degree program should be supported by appropriate evidence which should include:

- a. Number and level of advanced courses offered in the department and in related fields;
- b. Training of staff members;
- c. Research activity of staff members;
- d. Publications of staff members;
- e. Facilities for original investigation, including Library;
- f. Present graduate training program;
- g. Additional graduate work proposed. (Refer to New Program Proposal Procedures and Deadlines.)

After consultation with the Executive Vice President and Provost, and College Dean, the Dean of the Graduate School shall present the request to the Graduate Board for its advice and recommendation.

The Curriculum Committee of the Graduate Board has the specific responsibility of studying all proposals for new and modified graduate courses and degree programs, and recommending action to the Graduate Board. The Graduate Board shall hold a meeting for discussion of the request which any interested members of the Graduate Faculty may attend.

If the reaction of the Graduate Board to the request is favorable, at least two (2) competent individuals from outside the University, selected from a list suggested by the department will be invited to conduct a survey and to report their findings.

The Associate Vice President for Research and Dean of the Graduate School shall submit to the Graduate Board the comments of the visiting authorities. If favorable action is recommended by the external reviewers, the matter shall be brought before the Graduate Board for its approval or disapproval. The recommendations of the Graduate Board shall be referred to the President and Board of Trustees for final action.

1.1.2 Doctoral Programs Approved

Biochemistry & Molecular Biology 7/9/90
Biological Sciences 7/22/85
Chemical Engineering 11/20/62
Chemistry 11/7/57 (Inorganic Chemistry included 2/24/66)
Civil Engineering 11/21/67
Computer Science 1/25/99
Ecology & Environmental Sciences 9/20/93
Education 6/1/66
Electrical Engineering 1/94
Food & Nutrition Sciences
Forest Resources 4/10/70
Geological Sciences 1/25/88
History: American 5/20/59 (Great Britain and the Commonwealth and
Canadian-American Studies included 2/13/68)
Interdisciplinary Ph.D. 11/29/68
Functional Genomics 12/19/02
Marine Biology 1/98
Marine Bio-Resources 7/22/91
Mechanical Engineering 7/01
Microbiology 7/9/90
Oceanography 11/21/67
Physics 6/1/66

Plant Science 4/15/64
 Psychology: Experimental and General 4/17/61
 (Clinical Psychology included 10/21/65)
 Spatial Information Science & Engineering 1/23/89
 Wildlife Ecology 4/84
 Zoology 4/15/64

1.2 Master of Science and Master of Arts Programs

1.2.1 Master of Science Programs

A degree of Master of Science may be awarded for the completion of a planned and duly approved program of study. This program shall consist of a minimum of thirty (30) hours of work, including a thesis, beyond the requirements for admission.

The Graduate Faculty recognizes that for some candidates, in some departments, certain other requirements may be deemed of greater educative value than a thesis. Waiving of the thesis requirement will be recognized as an exception within the M.S. degree program, requiring approval of the Dean of the Graduate School.

Master of Science programs are approved in the following subject matter fields:

Accounting	Human Development
Animal Sciences	Information Systems
Biochemistry	Marine Biology
Biological Engineering	Marine Bio-Resources
Botany & Plant Pathology	Marine Policy
Chemical Engineering	Mechanical Engineering
Chemistry	Microbiology
Civil Engineering	Nursing
Computer Engineering	Oceanography
Computer Science	Physics
Ecology & Env. Sciences	Plant, Soil, & Env. Sciences
Education	Quaternary & Climate Studies
Electrical Engineering	Resource Economics & Policy
Entomology	Resource Utilization
Food Science & Human Nutrition	Spatial Info. Science & Eng.
Forestry	Wildlife Ecology
Geological Sciences	Zoology
Horticulture	

1.2.2 Master of Arts Programs GB 11/28/72

A degree of Master of Arts may be awarded for the completion of a planned and duly approved program of study. This program shall consist of a minimum of thirty (30) hours of work, which may include a thesis and/or such other requirements as approved by the Graduate Board, beyond the requirements for admission.

Master of Arts programs are approved in the following subject matter fields:

Communication	French
Communication Sciences and Disorders	History
Economics	Mathematics
Education	Psychology
English	Theatre (suspended)
Financial Economics	

VP 3/6/73; GB 11/17/77

Master of Arts programs including requirements other than a thesis are approved in the following subject matter fields:

Communication	Financial Economics
Communication Sciences and Disorders	History
Economics	Mathematics
English	

1.2.3 M.A. in Teaching Foreign Languages (French, German and Spanish) FGS 6/4/59; GS 9/1/97

This program is available for students who presently teach these languages at the elementary or secondary levels.

1.2.4 Master of Arts in Liberal Studies BOT 5/23/79

The Master of Arts in Liberal Studies offers an opportunity for interdisciplinary graduate work in the liberal arts to mature students who wish to study on a part-time basis. The program provides an alternative approach to traditional specialized graduate programs limited to a single discipline or profession by offering a liberal arts education at the graduate level.

Each student's program includes:

- a. several interdisciplinary core seminars;
- b. more traditional graduate courses selected to meet individual student goals; and
- c. an independent project developed directly out of the student's course work and research. A minimum of thirty (30) credits is required, and at least fifteen (15) hours must be in 500 and/or 600 level courses.

1.2.5 Master of Science in Teaching BOT 1/12/03

This is a content-rich, inquiry-based graduate program for secondary science and mathematics teachers.

1.3 Non-Thesis Professional Master's Degrees FGS 4/28/66

Non-thesis Master's degrees may be awarded for the completion of a planned and duly approved program of study. This program shall consist of a minimum of thirty (30) hours of work beyond the requirements for admission.

1.3.1 Master of Education FGS 3/20/39, 12/12/50, 3/30/54

The programs which lead to the degree of Master of Education are intended to expand the preparation of the teacher and also are for those experienced teachers who wish to prepare themselves for such specialized areas of school service and administration, supervision, or guidance. Eligibility for admission is based upon completion of an approved teacher-education program appropriate to the graduate program requested. Some programs may have additional requirements such as evidence of successful teaching experience, higher than minimum quality of undergraduate work, a personal interview and recommendations for the specific program involved.

Students in these degree programs are required to complete thirty-three (33) hours of work including two (2) graduate seminars. The seminars are in lieu of a thesis, graduate paper, or oral examination.

1.3.2 Master of Professional Studies
BOT 1/23/74; AFFIRM 7/1/97

This program is designed to provide professional training in a number of disciplines. A requirement for the M.P.S. is thirty (30) hours of course work of which at least fifteen (15) hours are to be selected from courses numbered 500 or above. The completion of a minimum of three hours of independent study is also required. A comprehensive written and/or oral examination will be required of each student at the completion of the graduate program. The program of study may be pursued on a part-time basis. The degree is presently offered in Animal Sciences, Biochemistry, and Microbiology.

1.3.3 Master of Business Administration
FGS 3/25/64

The objective of the M.B.A. program is the education of mature students for professional careers in business administration. More specifically, the program stresses the following objectives:

- a. to develop basic skills and knowledge of tool subjects in the field of business administration, rather than specialized functional techniques;
- b. to develop a management perspective, and aptitude for considering problems and making decisions from the viewpoint of the entire company rather than the necessarily restricted scope of the functional specialist;
- c. to promote a better understanding of the economic, social and political environment of business; and
- d. to stimulate a continuing interest on the part of the future executive, extending beyond his/her formal education, for individual study and development of his/her role and responsibilities.

Students in this program are required to complete a planned program of thirty (30) hours of graduate work. The program consists of a required core of twenty-one (21) hours and nine (9) hours of electives. Students who have had little or no undergraduate work in business and related subjects are required to supplement their formal degree program with additional background course work.

1.3.4 Master of Engineering
FGS 4/19/67; DE 4/26/96

The Master of Engineering degree (with program designation) is only offered in Biological Engineering and Engineering Physics. All other engineering disciplines offer a non-thesis M.S. degree. A minimum of thirty (30) semester hours of graduate courses is required for the M.E. degree. All other regulations relevant to the Master of Arts or Master of Science degree programs apply also to the Master of Engineering program.

1.3.5 Master of Public Administration
FGS 2/14/68

The Master of Public Administration is primarily a terminal professional degree for governmental officials who desire preparation for greater responsibilities and more challenging assignments, and for students anticipating administrative careers. It provides professional preparation for administrative leadership in public service. Students in the M.P.A. program are required to complete a planned program of forty-two (42) hours of graduate work. The program consists of elective courses of which nine (9) hours must be in Political Science. No thesis is required. Study may be pursued on a part-time basis.

1.3.6 Master of Music
BOT 4/8/71

This program provides for a concentration in one of three major areas: Music Education, Choral Conducting, and Performance. The individualized curriculum possibilities are designed to meet student interest, needs, and requirements within a flexible framework. The program provides opportunities to pursue a balance of academic and professionally-oriented courses.

1.3.7 Professional Master's Degree Programs:

Master of Arts in Teaching (Elementary/Secondary Education)	
Master of Forestry	BOT 1/29/87
Master of Social Work	BOT 1/25/88
Master of Wildlife Conservation	BOT 1/11/88

1.4 Certificate of Advanced Study
FGS 10/31/61; UMS 6/10/94

The certificate is awarded to students who complete in a satisfactory manner a planned program of at least thirty (30) hours of work beyond the master's degree. The minimum basis for admission to the program is the possession of a master's

degree in the area or subject involved. Students who wish to pursue a year of study beyond the master's degree in a new area or subject are expected to apply for admission to a second master's degree program. At present, this program is open to those who hold master's degrees in Education and Nursing. Other departments, if they choose to apply, may gain approval for such a program in the future. Only work taken after the completion of a master's degree can be used for credit toward the Certificate of Advanced Study.

1.5 Graduate Certificate Programs GB 2/1/01

University of Maine Policies and Procedures for Certificate Programs

1.5.1 General Principles

- a. The University of Maine offers selected certificate programs at the undergraduate and graduate levels.
- b. A certificate at either level is not a degree; rather, it is a focused collection of courses proposed by the faculty and formally recommended either by the Undergraduate Program and Curriculum Committee (UPCC) or by the Graduate Board and approved by the Associate Vice President for Academic Affairs. The didactic material encompassed within a certificate program may represent a more practice-oriented subset of an existing discipline.
- c. The University awards certificates upon the student's satisfactory completion of the approved program of coursework. The certificate affords the student a record of coherent academic accomplishment in a given discipline or set of related disciplines.
- d. The student's official transcript shall contain not only the listing of courses taken in the certificate program, but will also indicate successful completion of the program.

Procedures for Initiating Certificate Programs

The University of Maine Faculty creates proposals for new certificate programs following guidelines adopted by the UPCC (for programs consisting of undergraduate-level courses) or by the Graduate School (for programs consisting mainly of graduate-level courses). All proposals must be accompanied by endorsements from the department heads and deans of the colleges offering the coursework comprising the program and, for programs to be offered through distance education or under the auspices of Continuing Education, from the dean of the Division of Lifelong Learning. The Associate Vice President for Academic Affairs receives all proposals for new certificate programs and refers them either to the Graduate School or the UPCC for review and recommendation.

1.5.2 Guidelines for Initiating Certificate Programs

- a. The proposal must demonstrate that a need exists for the proposed new certificate program. This provision may be defined in terms of either external markets (i.e., external demand for the skills associated with such a certificate) or internal academic needs (i.e., the needs of a critical mass of students in a given discipline).
- b. The program proposal will address the likely impact of the graduate certificate program on any related degree program.
- c. Proposals for certificate programs that contain no new courses, no new faculty lines, and no additional costs to the University will be given expedited review in the approval process. The Graduate Board or its designee shall consider all graduate certificate program proposals for merit.
- d. Those proposals meeting the criteria set forth by the Graduate School are then recommended to the Associate Vice President for Academic Affairs for approval.
- e. The Graduate School will administer graduate certificate programs with the participation of the appropriate academic college(s) and graduate program(s). Each graduate certificate program must have a coordinator who is a member of the Graduate Faculty. Typically the coordinator will serve as the advisor to students in the certificate program and will also be responsible for program review and evaluation.
- f. For consideration by the Graduate School, proposals for new graduate certificate programs must contain the following information:
 - a statement of the educational objectives of the program;
 - a statement of the proposed course sequence associated with the certificate, including titles and course descriptions both for existing courses and any new courses that may be developed;
 - a statement of how the proposed course sequence associated with the certificate will meet the stated educational objectives;
 - a statement of the need for the proposed program and the basis for such a need, supported by either externally or internally derived data; and
 - the names of at least 2 Graduate Faculty members associated with or contributing to the certificate program, either by teaching one or more of the courses associated with the program or participating in the design of the course sequence. All faculty teaching in the certificate program must hold Graduate Faculty appointments in the academic unit through which the course is offered.

1.5.3 Curricular Criteria

- a. Graduate certificate programs may be at the post-baccalaureate, the post-master's or the post-doctoral level.
- b. Programs may be either free-standing or a concentration within an existing degree program.
- c. Programs may be adopted for an initial period of no more than five years. If the program is approved for a period of less than five years, it expires at the end of the period unless a program review specifically recommends its continuation (which may be for an indefinite period or for an additional fixed period). Any certificate program extending beyond five years must be reviewed prior to continuation to determine that the program is meeting its stated objectives.
- d. An appropriate number of credit hours must comprise the certificate program and may not be less than 9 nor more than 18 credits. The majority of course work for the certificate must be at least at the 500-level. Courses below 400-level cannot be used for credit in graduate certificate programs.
- e. The certificate proposal will address the possibility of program delivery using distance education technology.
- f. The proposal will address the timeframe in which the certificate program can be completed.

1.5.4 Student Eligibility and Admission Criteria

- a. An earned baccalaureate degree or its equivalent from an accredited college or university is required for admission to a graduate certificate program.
- b. Students who are currently enrolled in the Graduate School and who wish to pursue an approved graduate certificate program simultaneously must inform the Graduate School and the certificate coordinator of their intention to apply for admission to the certificate program before one-half of the required credits are completed.
- c. A maximum of 40% of the credit hours towards any certificate program may be accepted as transfer credit.
- d. A maximum of one course in which a grade of "C" was earned may be applied towards the requirements for a graduate certificate. Acceptance of a course towards a certificate does not guarantee acceptance of the same course towards a graduate degree.
- e. Each unit offering a graduate certificate shall establish the minimum grade point average, minimum TOEFL score, requirements for standardized test scores, whether or not certificate courses may be

counted towards a related master's degree program, and other similar criteria.

- f. Greater flexibility than that found in graduate degree admission requirements is intentionally built into graduate certificate programs so that the needs of the target student population may be met, if it is appropriate to do so.
- g. As such, a graduate certificate is not viewed as a guaranteed means of entry into a graduate degree program.
- h. The student will be required to complete the certificate program within the time limit specified for the program; if no time limit is specified, it shall be the same as that for completion of the master's degree.

1.5.5 Fiscal Criteria

- a. The proposal will address the fiscal arrangements for the program.
- b. A certificate graduate student may enroll on either a part-time or a full-time basis, as determined by the certificate program coordinator.
- c. Certificate students enrolled on a full-time basis will have access to many of the same campus services as other full-time graduate students.
- d. Certificate students may also be considered for merit-based financial aid by the department or program, as well as for need-based financial aid by the Student Financial Aid Office, but at a reduced priority compared to degree-seeking students.
- e. The proposal will address the likelihood that students enrolled in a graduate certificate program will have their tuition paid by employers or another third party.

1.5.6 Certificate Programs Approved

Information Systems Certificate Program 2/1/01

Health Care Administration Certificate Program 2/1/01

Advanced Engineered Wood Composites Certificate Program 10/4/01

Geographic Information Systems Certificate Program 10/4/01

1.6 Dual Degrees

GB 3/27/03

The University of Maine Graduate School allows students to pursue two graduate degrees under the circumstances detailed below. In all cases, dual degrees should be interpreted to include separate majors within the same degree (e.g. Master of Science), a combination of two different degrees, or a combination of a graduate

degree and certificate of advanced study. In all cases, students will receive separate diplomas or certificates.

1.6.1 Consecutive Degrees

Enrollment in consecutive dual degrees refers to matriculation in a second graduate degree program at the University of Maine after completion of the requirements for a first graduate degree earned at the University of Maine. A student may apply up to 9 credits earned in a graduate degree program at the University of Maine toward a master's degree or a Certificate of Advanced Study with approval of the student's graduate advisory committee and/or graduate program coordinator in the second graduate program. Thesis or research credits from the first program may not be counted toward the requirements of the second program. Additional policies on transfer credit in graduate certificate programs and doctoral programs are included elsewhere in the Policies and Regulations of the Graduate School.

1.6.2 Concurrent Degrees

Enrollment in concurrent dual degrees occurs when a student is matriculated in two graduate degree programs simultaneously. A student may not be enrolled in more than two graduate programs simultaneously.

In general, a student may pursue concurrent degrees only with approval of the appropriate graduate program coordinator(s) and the Dean of the Graduate School. The student must apply and be admitted to both programs. With approval of the student's graduate advisory committee(s) and/or the graduate program coordinator(s), a student may apply up to 9 University of Maine credits earned in one master's degree toward the requirements for a second master's degree or Certificate of Advanced Study. Transfer policy for doctoral degrees is covered elsewhere in the Policies and Regulations of the Graduate School. Generally, students must complete separate theses if required by both programs. Completion of the degree requirements for the two programs need not be at the same time.

If a student's tuition is funded by one or more units, it is up to the funding unit to decide if tuition may cover courses taken solely for completion of the second program.

1.6.3 Integrated Dual Degrees

Some units have formalized concurrent dual degrees between programs which create an integrated program linking the two disciplines, while continuing to award separate degrees. Generally, these dual degree programs follow the rules outlined in (1.6) above. However, if the formalized dual degree program features further integration, such as a single admissions process, submission of

a single thesis, a single advisory committee composed of members from both programs, or more than 9 credits of common courses, the program, including proposed programs of study, must be approved by the Dean of the Graduate School and the Graduate Board of the University of Maine.

2. ADMISSIONS

2.1 General Policy

In order to be admitted to graduate study an applicant must have received a baccalaureate degree or the equivalent from an accredited college or university of recognized standing and demonstrate by previous scholastic record, entrance examinations, or other evidence, the ability to pursue advanced study and research. The Executive Committee (herein referred to as Executive Committee) shall resolve individual admission problems.

2.1.1 Credentials Required

DGS 2/7/63

Two (2) complete applications calling for biographical and other information concerning the applicant.

Three (3) letters of recommendation from persons familiar with the applicant's qualifications. These letters should be academic references, although professional references are acceptable for some professional programs.

Two (2) copies of an official transcript of all previously attempted college level work.

Scores from standard tests as outlined in 2.12.

2.1.2 Graduate Admissions Examinations

FGS 1/15/70; GB 2/19/81, 4/22/82

2.1.2.1 Graduate Record Examination

Applicants (for admission to the Graduate School) in most programs shall be required to submit as part of their application, the aptitude and appropriate advanced test scores on the Graduate Record Examination. The advanced test of the Graduate Record Examination will not be required of applicants for admission to Graduate School in those programs where no appropriate advanced test is available. This waiver of the advanced test is at the option of the faculty in these programs. Graduate Record Examination scores will not be required of students entering the Certificate of Advanced Study programs in Education and Nursing.

Graduate Record Examination scores will not be required of students entering the Master of Arts in Liberal Studies Program.

2.1.2.2 Alternative Entrance Examinations AFFIRM 7/1/97

For sufficient reasons, departments may require scores from other tests in addition to, or in lieu of, the standard Graduate Record Examination scores. The Graduate Management Admission Test is currently required of applicants for admission to the program leading to the Master of Business Administration and Master of Public Administration. These GMAT scores are considered to be in lieu of the GRE scores. Applicants for admission to non-thesis programs in the College of Education and Human Development, the School of Nursing, and The School of Social Work must submit Graduate Record Examination or Miller Analogies Test scores as part of the application for graduate study. However, applicants for admission to a thesis program in the College of Education and Human Development must submit scores from the Graduate Record Examination as part of the application for graduate study.

2.1.3 Application Procedure DGS 9/1/66; AFFIRM 7/1/97

All documents relating to an application for admission to graduate programs are to be sent to the Graduate School. Once the official application form is received, all materials relating to the application will be forwarded, upon receipt, to the graduate committee of the institutional unit concerned. The graduate committee of the institutional unit may, when it feels it has sufficient information, make a recommendation regarding the application. This will be made on forms provided by the Graduate School. Ordinarily, the Graduate School will forward the form for each applicant when the applicant's file is complete, unless the graduate committee has previously requested otherwise.

Final action taken by the Dean of the Graduate School will be heavily influenced by the recommendations of the institutional unit graduate committee. However, other factors such as adherence to maintenance of minimum quality standards will also be considered in the decision.

If the graduate committee recommends admission, all papers relating to the application for admission should be retained for use by the institutional unit. If the recommendation is for rejection, the papers may be returned to the Graduate School.

2.1.4 Deadline for Application
EC 10/1/59

Application for admission and supporting material must be received by the Graduate School six (6) weeks prior to registration date involved in order to be assured of admission prior to registration.

2.1.5 Deadline for Enrollment
DGS 1/2/66

An applicant admitted to a graduate program must register in that semester for which he/she has been admitted unless other arrangements, in writing, have been made.

2.1.6 Readmission to the Graduate School

A student previously registered in the Graduate School who has failed to maintain continuous enrollment or who has withdrawn, or a student who failed to matriculate in accordance with paragraph 2.15 above, and who wishes to resume studies, must file an Application for Readmission to the Graduate School. This form may be submitted in person or by mail by the regularly published deadlines for the semester or summer session. If the student has attended any other institution during the period when he/she was not registered at The University of Maine, an official transcript of this work must be submitted. An Application for Readmission will carry no preference and will be treated in the same manner as an application for initial admission.

2.2 Specific Program Requirements - Master of Education
FGS 12/12/50

Both previous academic record and out-of-school experience will be considered in admitting students for work for this degree. A lower grade point average than that required for students who want to work for a Master of Arts or Master of Science degree may be accepted.

2.3 Committee to Consider Application
FGS 3/25/64

See Section 12.2 Institutional Unit Graduate Committee.

2.4 Classification of Admissions FGS 6/1/63; GB 3/20/75

2.4.1 Regular Admission

Granted to a student who has a record of high scholarship in his/her academic field and about whom there is no question of ability to carry on graduate study.

2.4.2 Provisional Admission

If a student does not have all the prerequisite course work for admission to graduate study in the academic field, or if deficiencies in the application exist, such as lack of entrance examination scores, and/or a letter of recommendation, entrance may be granted on a provisional basis. Prerequisite and elective courses must be made a part of the student's program of study.

2.4.3 Conditional Admission FGS 12/8/66; GB 4/28/83

Under exceptional circumstances, a student who does not meet the established academic requirements may be admitted on a conditional basis, provided, sufficient favorable evidence is supplied to show that he/she is capable of doing satisfactory graduate work. Letters of recommendation from professors in the student's academic field will be considered very carefully.

For those admitted on a conditional basis, it shall be stipulated in the admission letter that the student must earn grades of A or B in all courses of his/her first nine (9) hours of graduate degree credit.

A change to regular status may be recommended by the student's advisory committee after the attainment of nine (9) hours of graduate degree credit with acceptable grades (A or B). Upon the recommendation of the student's advisory committee, if this requirement is not met, the student may either be continued on condition or be terminated.

2.4.4 Tentative Admission DGS 6/1/63

Students who file applications during the final year of undergraduate work and who are thus unable to supply complete transcripts, will be given tentative classification. Admission on this basis is contingent upon the satisfactory completion of the undergraduate program and receipt by the Graduate School of a supplementary transcript containing certification of the degree.

2.4.5 Non-Degree Admission EC 12/12/47, 2/15/79

Non-degree students are those whose previous background or work does not immediately qualify them for admission to Graduate School or whose interest in advanced study is not related to degree programs. Non-degree status may be granted to students not planning to work for a degree, provided they meet the established entrance requirements. Such students are not required to follow course sequences, but are held to the same work standards as are all other graduate students. Students in this category are not eligible to apply for candidacy for any higher degree unless, upon written request by the student, this classification is changed to regular. The change must be approved by the intended major department. Work taken as a non-degree student cannot be applied to a degree later unless it fits into an approved program of study and all credits must be completed within the appropriate time limit.

2.4.6 Visiting Graduate Student Admission EC 2/12/47, 2/15/79; GB 4/28/83, 10/31/02

A student in good standing in another recognized graduate school who wishes to enroll for a limited number of course credits, and who plans to resume work at the school of original admission, may be admitted as a visiting graduate student. Admission is granted through submission of a Visiting Graduate Student Admission Form signed by the dean of the graduate school in which the student is enrolled.

2.5 International Student Application FGS 10/14/64

All international applicants whose native language is not English, are required to take the Test of English as a Foreign Language (TOEFL) exam and submit scores as part of the application documents. A score of 550 or above or an equivalent score on the computer-based TOEFL (CBT) is required for regular admission. To be awarded a teaching assistantship, applicants must have achieved a 580 or equivalent CBT score on the TOEFL. Applicants with scores below 550 or equivalent CBT score will be required to take English language training.

It is requested that all foreign transcripts provide information as to the student's rank in class.

3. REGISTRATION

Prior to the beginning of each semester, usually during the pre-registration period of the preceding semester, each student is required to consult with his/her advisor, complete a registration form, and obtain the signature of the advisor. The signed registration material must then be taken to the Graduate School for approval. Registration is not complete until all fees have been paid at the Bursar's Office.

FGS 1/15/70

The listing of a course as suitable for graduate credit does not mean that any graduate student has a right to use the course for credit toward his/her degree. The course must be included in a planned program of study duly approved by the student's advisory committee. (See Section 8.)

3.1 Staff Member Registration BOT 7/22/69, 10/23/72, 2/1/85

Members of the University faculty at the instructor level or above may become candidates for advanced degrees from any College or School of The University of Maine other than the University of Maine College or School in which they hold faculty appointment.

BOT 3/15/69, 6/23/76

Faculty and staff members of the University of Maine System who are employed full-time may register for a maximum of two (2) tuition free courses per semester and during the summer. It is assumed that course prerequisites will be met.

The above implies tacitly that this privilege is not extended to persons employed on a part-time basis or to persons who are on a leave of absence or sabbatical.

3.2 Limitations of Registration FGS 12/12/50; GB 2/24/83

Graduate courses ought to provide adequate opportunity for formal instruction, student preparation, faculty-student interaction, reflection on and summary of course materials by the student, and, when appropriate, laboratory or field experience.

During the fall and spring semesters, course credit is normally based upon one (1) credit hour per lecture contact hour during a 14-15 week semester. During Summer and other sessions not part of the traditional academic year, credit is normally based upon no more than one (1) credit hour per calendar week of instruction. In some instances, intensive courses of shorter duration may be assigned more credit than that which might be based upon the actual instructional period. In such cases, it is

expected that course preparation and/or follow-up projects or reports by students consistent with the above general guidelines will be required.

3.2.1 Remunerative Work

FGS 1/26/54; EC 1/14/58; FPE 5/22/73

Graduate students engaged in full-time remunerative work are limited to six (6) hours of graduate credit per semester. Students holding graduate assistantships are normally considered to be employed on a half-time basis and are limited to twelve (12) hours of total credit per semester.

3.2.2 Summer Session

FGS 12/12/50

A full-time load in the Summer Session is one (1) credit hour. Students attending a three-week session are limited to three (3) hours of credit. Students who have previously attended the University as graduate students may be permitted to register for a maximum of seven (7) hours, provided their record from the last previous enrollment as a graduate student was B or better. In no case may a student carry more than seven (7) hours of work for graduate credit during the six-week session.

3.2.3 Doctoral Students

EC 11/14/74, 4/4/86

All doctoral students registering for dissertation during the academic year shall have credit hours assigned for ____699.

Normally, a full-time doctoral student will register for a minimum of six (6) credits each semester. Such registration may include both course and dissertation credits.

3.3 Registration for Graduate-Level Courses by Undergraduate Students

3.3.1 Courses Taken for Undergraduate Degree Credit

GB 3/26/98

University of Maine undergraduate students with appropriate qualifications and permission of the instructor may take graduate-level (500-599) courses for undergraduate degree credit.

3.3.2 Courses Taken for Graduate Degree Credit
GB 10/21/71, 3/26/98

University of Maine undergraduates, who lack not more than nine (9) semester hours toward a bachelor's degree (counting required and sequence courses), if they meet admission requirements, may register in the Graduate School for limited graduate course credit while concurrently completing work for the bachelor's degree.

Procedure
AFFIRM 7/1/97

The student applies in writing to the Dean of the Graduate School to be permitted to take specific courses for graduate credit. The letter must also be signed by the chairperson or graduate coordinator of the program concerned. If the request is approved, the student's registration material should be brought to the Graduate School so that proper notations may be made authorizing the Office of Student Records to record the courses for graduate credit.

3.4 Summer Session and Continuing Education
FGS 11/12/64; DGS 2/14/67, 9/17/69; GB 3/17/77

Students in Summer Session or in Continuing Education who present evidence of holding a bachelor's degree or its equivalent may register for graduate credit on a non-degree basis for 500-level courses and above. Registration for graduate credit and/or 500-600 level courses is limited to students who have been admitted to the Graduate School. Such students are expected to have satisfied all course prerequisites. In case of doubt, the instructor shall be the final authority in judging the qualifications of a student to take a particular course.

3.5 Adding/Dropping Courses
FGS 10/12/65; GB 4/28/83

University policy generally rules out adding any course after the first week of classes during the regular semester or after one day in summer session.

Drop actions (without academic penalty) will be accepted on the signature of the student's advisor during the first five weeks in a regular semester or the equivalent in a summer session; and thereafter, "Drops" will be considered by the Graduate School only after consultation with the advisor.

Note: Advisors and students should review current refund policies available from the Bursar's Office.

3.6 International Student Registration FGS 10/14/64

No international student will be allowed to register for graduate degree credit unless the student has a current visa valid for study at The University of Maine. Transfer of international students from another educational institution will not be permitted until the student has completed at least one (1) term or semester at the institution from which the student is transferring.

3.7 Full-time/Part-time Student Status GB 3/17/77, 10/20/77, 4/17/97

Graduate students admitted as full-time students must maintain full-time continuous enrollment. (See Section 3.83.)

Full-time registration for a graduate student is defined to be registration for six (6) or more degree hours per semester and/or registration for at least one credit hour in the Summer Session. Part-time registration is defined as registration for fewer than six (6) hours.

Doctoral students who have been admitted to candidacy and students in their final semester of study may maintain full-time enrollment status by registering for a minimum of one (1) thesis credit during the Fall and Spring semesters.

3.8 Enrollment Restrictions

3.8.1 Graduate Assistants

Graduate assistants must maintain full-time registration status (six (6) or more degree hours per semester) while they hold an assistantship, and they may not register for more than twelve (12) credit hours in one (1) semester.

3.8.2 Fellowships and Scholarships

Recipients of fellowships and scholarships are required to register for a minimum of nine (9) degree hours each semester.

3.8.3 Continuous Enrollment GB 3/17/77, 10/20/77, 12/20/84

A student who fails to maintain continuous enrollment is considered inactive and must apply for readmission to the Graduate School in order to resume work on a graduate degree. Continuous enrollment means that every graduate

student admitted for full-time study is required to register each semester, exclusive of the Summer Session, from the time of the first enrollment in the Graduate School of The University of Maine until completion of all requirements for the graduate degree, including the filing of the thesis or dissertation and the passing of the Final Oral Examination.

A graduate student who has been admitted on a part-time basis is required to enroll and register at least once every twelve (12) months from the time of first registration in the Graduate School until the completion of all requirements for the graduate degree, including the filing of the thesis and the passing of the Oral Examination.

Course work included in a student's program of study taken at a campus other than UM may satisfy the continuous enrollment requirement provided the student's UM advisor and the Graduate School have approved the registration in advance and in writing.

All students, both full-time and part-time are required to register in the semester in which the degree requirements are completed.

3.9 On-Leave Registration AFFIRM 7/1/97

If a graduate student in good standing is to be away from the University and out of contact with the University faculty and facilities for a specific period of time, usually not to exceed two (2) successive semesters, the student must request "On-Leave" status. Time spent in on-leave status (for a maximum of one (1) year) is not considered part of the time limit for completion of degree. The student must petition for on-leave status and obtain the approval of his/her advisor and the Dean of the Graduate School. On-leave status will be granted only under extenuating circumstances. This type of enrollment maintains a place for the student as a member of the Graduate School and permits the student to use the University Library, but does not entitle the student to any other University privileges of a regularly enrolled full-time student, or part-time student. A non-refundable fee is charged for registration as an on-leave student.

3.9.1 Full-time Students

The fee covers two (2) consecutive academic year semesters or any part thereof. An on-leave student returning to the University on or before the termination of the period of the approved leave of absence should register in the usual way. This registration will cancel any remaining leave period. If circumstances require a later leave of absence, the student must petition and proceed again in the same manner as for an initial leave of absence.

3.9.2 Part-time Students

The fee covers one (1) twelve-month period or any single part thereof. On-leave students returning to the University on or before the termination of the period of their approved leave of absence should register in the usual way and by this registration will cancel any remaining leave period.

4. GENERAL REQUIREMENTS

IT IS THE RESPONSIBILITY OF THE GRADUATE STUDENT TO BECOME FAMILIAR WITH THE VARIOUS REQUIREMENTS OF GRADUATE STUDY THAT APPLY IN HIS/HER CASE AND TO SATISFY THEM IN THE PROPER WAY.

4.1 Residence Requirement GB 1/27/00

Residence is required to encourage students to establish a close association with the faculty, other graduate students, and the university community. Students under the direction of faculty members are encouraged to engage in independent or collaborative research utilizing the full facilities of the university. Increasing use of technology in education has created new means for delivery of courses, for communication with faculty and other students, and for access to campus resources, including library holdings. Further, the emergence of more professionally-oriented graduate programs that are based on the complementary nature of educational experience and work experience suggest that some graduate students may benefit from a program of study that does not necessarily involve full-time study on campus.

Recognizing the uniqueness of individual graduate programs, the Graduate School sets forth the following minimum requirements for residence which acknowledge other influences such as professional activities that play an important role in the graduate experiences of some doctoral students. Each institutional unit graduate committee bears the responsibility for adopting additional residency requirements that are appropriate for the mission of its own graduate programs.

4.1.1 Master's Degrees and Certificate of Advanced Study GB 10/20/77, 10/22/92, 11/21/96

At least 50% of the course credits applied toward the master's degree or certificate must be taken through The University of Maine. Course credit taken in an approved University of Maine graduate outreach program and/or from The University of Maine via distance education technology may be used to satisfy this requirement.

4.1.2 Doctoral Programs GB 9/20/84, 2/24/00

The minimum residence requirement for doctoral programs is met by registering for courses or thesis research through The University of Maine for four semesters beyond the baccalaureate degree. Students entering doctoral programs with the master's degree must register for at least two semesters of course work or research at the University. For the purposes of satisfying residency, the summer session may count as a semester.

4.2 Tuition Requirement
GB 5/18/78, 10/19/89

Doctoral students will be charged tuition based on the number of credit hours for which they register. In general, no more than thirty (30) semester hours of transfer credit from a master's degree will be accepted.

4.3 Time Limit for Completion of Requirements (See also Section 4.6.)

4.3.1 Master's Degrees and Certificate of Advanced Study
GB 5/20/71/, 2/1/01

All work for a master's degree and for a Certificate of Advanced Study must be completed within six (6) years of matriculation.

4.3.2 Doctor of Philosophy and Doctor of Education
GB 5/20/71

All work for a doctoral degree must be completed within four (4) years of admission to candidacy. Students must be admitted to candidacy within four (4) years of registration for the first work presented for satisfaction of degree requirements.

4.4 Admission to Candidacy
GB 3/17/77, 4/26/90; AFFIRM 7/1/97

Admission to Candidacy applies only to students enrolled in doctoral programs and signifies that the student has completed most degree requirements. Graduate students in doctoral programs will be admitted to candidacy when the Dean of the Graduate School is informed by the Institutional Unit Committee that:

- a. the student has successfully passed the comprehensive and/or qualifying examination;
- b. the student has met all other program requirements, such as language proficiency; and
- c. the student's committee has approved a written statement satisfying the program's requirement for a research proposal.

4.5 Course Credit

4.5.1 Work Taken (at The University of Maine) Prior to Graduate Degree Admission FGS 1/15/70; GB 3/1/01

Graduate degree credit will be granted routinely only to those students admitted to graduate programs. Up to twelve (12) hours of graduate degree credit may be granted with approval of the student's advisory committee for work done at The University of Maine prior to admission, if the student was post-baccalaureate at the time of registration. (For exception, see Section 3.3.) **If transfer credit is also granted, (up to 6 hours, see 4.52), the transfer credit must be included in the maximum of twelve hours taken prior to admission. Exceptions to this policy may be made for graduate students in approved graduate certificate programs.**

4.5.2 Transfer Credit (Work Taken at Other Institutions Including Other Campuses of the University of Maine System Prior to Admission) FGS 12/8/66

When courses taken at other institutions have been accepted toward partial fulfillment of requirements for an advanced degree, up to six (6) hours of appropriate credit will be transferred. Evaluation of performance levels and satisfaction of quality standards shall be based entirely on grades earned in courses taken in the University of Maine System only.

FGS 3/25/65; GB 2/19/82, 3/29/84, 1/24/85

A maximum of six (6) hours of credit in the case of a master's degree student and thirty (30) hours beyond the bachelor's degree in the case of a Doctor of Philosophy candidate may be accepted in transfer, (exclusive of work taken at UM), subject to approval of the student's program committee, for appropriate courses completed prior to admission. Requests for acceptance of additional credits must be filed on a Request for Exception to Regulation, but normally no more than one third of the total hours required for the program may be transferred.

BOT 6/1/66

In general, no more than forty-five (45) semester hours of transfer credit, subject to the approval of the student's program committee, will be accepted in the case of a Doctor of Education candidate.

FGS 3/25/65

Credit cannot be transferred for:

- a. courses which would not, if taken at The University of Maine, receive graduate credit;

- b. courses in which a grade lower than B was received;
- c. correspondence courses;
- d. courses which are inappropriate for inclusion in the student's degree program; and
- e. courses completed at such a date as to exceed the time limit prescribed for a particular degree program.

4.5.3 Extramural Registration (work taken at other institutions after graduate degree enrollment at The University of Maine)
FGS 3/25/65; GB 12/16/71, 4/18/74, 11/21/96

A student may arrange to take work at another institution after being admitted as a graduate student at The University of Maine. Such arrangements must, however, be approved by the student's advisor and by the Dean of the Graduate School prior to registration in the course. (Forms for Extramural Credit, available from the Graduate School, should be used.) The conditions for transfer shall comply with basic transfer policy and may not exceed 50% of the student's entire program for the degree. Registration for extramural credit will also satisfy the continuous enrollment requirement. (Section 3.83.)

4.6 Revalidation of Course Credit
GB 5/20/71

If requirements for an advanced degree or certification are not completed within the time period specified, application for readmission must be made before the student is allowed to continue the work for the degree. Courses which exceed the time limit may be counted only if revalidated by a written examination in the course as currently given, or its equivalent if the course is no longer being offered. This written examination should demonstrate the student's knowledge of current literature and/or practice in the particular field of study. A pass/fail grade is attached. If the application for readmission is approved, the student's program of study will be revised in view of the work completed and/or revalidated.

4.7 Course Requirements for Master's Degree and for Certificate of Advanced Study
FGS 1/16/69; EC 4/4/86

Effective September 1, 1970, any graduate student who has completed nine (9) or fewer hours of credit toward a master's degree will be required to present a minimum of twelve (12) hours (exclusive of thesis) of 500 and/or 600 level course work in partial satisfaction of requirements for a master's degree. The same requirement shall apply to the Certificate of Advanced Study.

5. APPLICATION FOR DEGREE

EC 10/5/61

All candidates who expect to be awarded a degree or Certificate of Advanced Study must apply for the degree or certificate no later than February 1 for May Commencement; no later than June 1 for August graduation; or no later than October 15 for December graduation. Applications are made at the Office of Student Records.

FGS 10/13/66

The final title of the thesis is a part of the application for degree.

6. REQUESTS FOR EXCEPTIONS TO REGULATIONS

FGS 4/25/63

Students have the privilege of petitioning for exceptions to the regulations of the Graduate Faculty but must submit convincing evidence that the exception is needed and is warranted.

6.1 Procedure for Submission

Requests, after being signed by the advisor or by the Advisory Committee, shall be addressed to the Executive Committee and shall be submitted on forms obtainable from the Graduate School.

6.2 Filing and Review

Requests will generally be reviewed prior to registration for action by the Executive Committee at a regular meeting. Requests must, therefore, be filed well in advance of a monthly meeting date if they are to be placed on the agenda.

6.3 Authority to Grant Exceptions

FGS 4/27/70

The Executive Committee has the authority to grant exceptions to the Graduate Faculty regulations if, in its judgment, such action is in accord with the educational objectives of the Graduate School.

7. GRADUATE LEVEL COURSES

FGS 4/21/60, 4/27/70; VP 10/1/70

The Graduate Board has sole authority to determine whether or not any course offered in any institutional unit may be offered for graduate credit. No course may be listed in any publication as carrying graduate credit unless approved by the Graduate Board.

FGS 12/9/48

The Graduate Faculty may allow graduate degree credit to one student but not to another for the same course.

7.1 Approval of Courses

FGS 4/27/70

The Graduate Board shall recommend approval of new courses. (See Article IV, Section 1.e. of the Constitution.)

7.2 Designation of Courses for Graduate Credit

FGS 4/21/60

The listing of a course as suitable for graduate credit does not mean that any graduate student has a right to use the course for credit toward his/her degree. The course must be included in a planned program of study duly approved by the student's advisory committee.

7.2.1 Course Numbering

Deans 2/20/64; EC 4/9/86

Courses numbered 100 to 399 are undergraduate courses. They are open to graduate students but may not be used to satisfy advanced degree course requirements. Courses numbered 400 to 499 are upper-class undergraduate courses which are approved for graduate credit with prior approval of the student's advisory committee. Courses numbered 500 to 599 are graduate courses open to undergraduate honor students, or those whose advancement in the field will permit their taking a graduate level course among graduate students without disadvantage to themselves. Courses numbered 600 to 699 are exclusively for matriculated graduate students.

7.2.2 Criteria for Approval

FGS 4/21/60; EC 4/4/86

Courses which are approved for graduate credit should represent study of an advanced nature. Advanced courses are those following a substantial amount of training in the subject or area. Only advanced courses may be credited in the subject in which the candidate expects to obtain his/her degree. The courses in a doctoral program, beyond the first or master's level year, should

be predominantly in courses primarily for graduate students (500 and 600 level courses).

7.3 Master List of Courses
FGS 12/3/59, 4/21/60, 4/27/70

A master list of courses approved for graduate credit shall be maintained. This list shall include all courses duly approved by the Graduate Board for graduate credit. The current Graduate Catalog is regarded as the official listing of courses approved for graduate credit. Approval by the Graduate Board is required before any course not appearing in the Graduate Catalog may be listed in any University publication as being offered for graduate credit (degree or non-degree).

7.4 Courses Not on Approved List
FGS 4/21/60

Explicit approval of the advisory committee chairperson and the Dean of the Graduate School is required, in advance, if graduate credit is to be allowed for a student for any course not listed in the current graduate catalog.

7.5 Continuing Education Courses and Interactive Television (ITV) Courses
FGS 4/22/46; GB 10/22/92

Continuing Education courses and Interactive Television (ITV) courses shall parallel, in content, regular University courses acceptable for graduate credit, and meet the same time requirements and scholastic standards maintained in the latter. In the event no comparable residence courses are offered, Continuing Education courses and ITV courses must conform to standards maintained for similar residence courses acceptable for residence credit. Continuing Education courses and ITV courses must meet the approval of the Graduate Board as indicated above.

8. PROGRAM OF STUDY

FGS 10/13/66; DGS 5/1/72; GB 3/20/75, 10/20/81, 3/29/84; EC 4/4/86

A program of study is planned by the student in consultation with his/her advisor or advisory committee as early as possible. The program shall consist of an outline of courses to be passed and research to be undertaken. Prerequisite and elective courses are a part of the student's program of study. (See Section 3.) By the completion of the first twelve (12) hours of graduate credit or before the third registration, whichever comes first, the student must submit a program of study to the Graduate School or registration will not be approved. When the program has been approved by the student's advisory committee and the chairperson of the institutional unit graduate committee and has been filed in the Graduate School, it becomes the student's required curriculum.

A graduate student working toward a master's degree will be required to present a minimum of twelve (12) hours (exclusive of thesis) of 500 and/or 600 level course work in partial satisfaction of requirements for the degree. The same requirement shall apply to the Certificate of Advanced Study.

8.1 Forms Used FGS 6/4/64

The entire program of study is to be presented on forms available from the Graduate School. Master's students should use the form entitled "Program of Study for the Master's Degree." Doctoral students should use the form entitled "Program of Study and Research for the Doctoral Degree." All programs are to be filled out in triplicate with the original copy filed in the Graduate School, one copy for the student's advisor, and one retained by the student.

8.2 Graduate Student Advisement GB 2/18/88; AFFIRM 7/1/97

All graduate students who are enrolled in degree programs must be assigned an advisor or an advisory committee.

For students in thesis programs, an advisory committee will be appointed as early as possible in the student's course of study.

For students enrolled in non-thesis programs, a single advisor may be appointed in lieu of an advisory committee. This advisor, a member of the Graduate Faculty, shall be appointed by the Dean of the Graduate School on the advice of the chairperson of the institutional unit committee, as early as possible in the student's course of study.

Advisory Committee

GB 2/18/88; AFFIRM 7/1/97

A student's advisory committee is appointed by the Dean of the Graduate School, on the advice of the chairperson of the institutional unit graduate committee, as early as possible in the student's course of study. The student's major advisor or thesis advisor normally chairs the student's advisory committee. If the student's research advisor is not a regular full-time graduate faculty member of The University of Maine, a regular full-time graduate faculty member must be named in addition to the research advisor to serve as co-chair of the student's advisory committee. The advisory committee is composed of a minimum of three (3) members of the graduate faculty. It is highly recommended that one (1) committee member be selected from the graduate faculty of a department other than the student's intended major. The advisory committee guides the student on course work and the thesis and often serves as the examining committee for the master's final examination. A separate examining committee may be appointed by the Dean of the Graduate School upon the request of the chairperson of the institutional unit graduate committee. Membership of the committee may be changed to meet the needs of the student. (See Article III, Section 5 of the Constitution.)

8.3 Changes in Program

FGS 10/13/66; AFFIRM 7/1/97

The form "Request for Change in Program" is used when the student wishes to substitute other work in place of that prescribed in the official program of study. Changes become official when the Request for Change in Program form is approved by the student's advisory committee and filed in the Graduate School. It is the student's responsibility to obtain approval of major changes in his/her course of study at the time such changes are made. Minor changes may be made and the Request for Change in Program form filed in the Graduate School during the semester in which graduation occurs.

8.4 Special Program Forms

FGS 6/4/64

Curricula which include appropriate courses for graduate students who are engaged in, or are preparing for, educational work in the public school system have been prepared by the Faculty of the College of Education and Human Development. Copies of these prepared curricula are available in photocopied form for the use of the student and the advisor and satisfy the requirements for a program of study for the Master of Education degree. Similar programs are used for the Certificate of Advanced Study, Master of Business Administration, and Master of Public Administration and these also satisfy the requirements.

9. EXAMINATIONS

9.1 Master's Examinations **GB 2/18/88**

All students completing master's degrees are expected to demonstrate comprehensive knowledge of their subject areas. This may be accomplished by completing an approved course of study, and/or by passing written or oral examinations. All students enrolled in thesis programs are required to pass an oral examination as described in Section 9.1.1. Additional examinations may be required by individual programs.

9.1.1 Master's Oral Examination

9.1.1.1 General **GB 1/18/88**

Near the end of the course of study for the master's degree, candidates in thesis programs will be required to pass an oral examination. The oral examination will take place after the thesis has been approved and delivered to the Graduate School. The oral examination may cover the thesis as well as course work. The Graduate School must be informed of the date, time and place of the examination at least two (2) weeks in advance. A form for this purpose is available from the Graduate School.

Oral examinations are open to all members of the Graduate Faculty. Any member of the faculty at the examination has the privilege of questioning the candidate. Only members of the Examining Committee are eligible to vote.

9.1.1.2 Nature of Examination

The examination should be comprehensive in nature, and should be organized around a central theme such as the thesis. A formal presentation of the thesis or paper by the candidate is recommended. The student shall be informed of the nature of the examination by his/her major advisor. The two-hour period is to be considered the maximum and not the minimum time of the examination.

9.1.1.3 The Examining Committee **AFFIRM 7/1/97**

There shall be a small examining committee of from three (3) to five (5) members present throughout the examination. The student's advisory committee usually serves as the examining committee but a different

examining committee may be selected with the consent of the Dean of the Graduate School. The candidate's major advisor shall chair the committee. By custom, both the Associate Vice President for Research and Dean of the Graduate School and the Associate Dean of the Graduate School are ex officio members of the examining committee. The examining committee shall have the authority to require the candidate to repeat the examination in whole or in part. The committee vote must be unanimous for the candidate to pass the examination.

9.2 Doctoral Examinations

9.2.1 Comprehensive Examinations

Comprehensive examinations, which may be written, oral, or both, will be administered by the department of the student's major subject and passed to the satisfaction of his/her advisory committee. These examinations may not be taken until the student has completed at least one and one-half (1½) years, or the equivalent, of study beyond the bachelor's degree. These examinations are given to determine whether the student has made satisfactory progress in his/her study, and is qualified to pursue thesis research profitably and to meet training requirements for the degree.

9.2.2 Final Examinations

EC 4/4/86; AFFIRM 7/1/97

After the doctoral thesis has been accepted by the candidate's advisory committee, the required copy of the thesis shall be presented to the Graduate School. The candidate must then present himself/herself for the final examination to an examining committee of no less than five (5) members appointed by the Dean of the Graduate School upon the recommendation of the chairperson of the institutional unit graduate committee. Other members of the faculty may be invited to attend and participate in the questioning but only members of the committee may vote in determining the outcome.

GB 11/18/70

The committee vote need not be unanimous for a doctoral candidate to pass the final oral examination; however, only one (1) negative vote will be permitted.

10. THESIS REQUIREMENT

A thesis is generally required as part of all programs leading to a Master of Arts, Master of Science, Doctor of Philosophy, or Doctor of Education. However, some master's programs do have non-thesis options.

10.1 Nature of Thesis

10.1.1 Master's FGS 1/21/35

It is ordinarily expected that the thesis for the Master's degree shall be a limited piece of original research, with the design of making a contribution to scholarship in the student's particular field. It should involve training in the investigation of primary resources, the sifting and evaluation of data, the recombining and organizing of material, and the final construction and presentation of the thesis in satisfactory written or other graphic form.

Any department is authorized to submit for approval of the Executive Committee, in the case of a student of proven maturity, intelligence, accuracy, and industry whose objectives and interest are not best furthered by this type of research, a thesis of a different type. This may consist of a digest and analysis of the literature on a topic or problem of major importance in the student's field; a comprehensive outline and critique of current practices; or a report of a project undertaken and carried on under competent direction.

10.1.2 Doctoral Dissertation FGS 1/6/56

The doctoral thesis must demonstrate the candidate's mastery of the area of his/her research. It must embody results of an original investigation in his/her principal field of study. It must give evidence of an exhaustive study of a specialized field and must be an authoritative statement of knowledge on the subject or produce a new interpretation by rearrangement or re-analysis of existing data. The work must be a definite contribution to knowledge of sufficient importance to warrant its publication.

10.2 Approvals Related to Thesis

10.2.1 Thesis Subject 10/13/66

The subject must be formally submitted to the Graduate School at the time the student submits the program of study. Approval of the thesis subject by the student's advisory committee is required.

10.2.2 Completed Thesis

FGS 1/16/39; AFFIRM 7/1/97

An approved copy of the thesis must be deposited in the Graduate School no later than 24 hours before the final examination. It must have been previously approved by a committee which shall be appointed by the Dean of the Graduate School. The thesis shall be read and approved by no fewer than three (3) persons.

GB 12/10/81, 12/86

The “Tentative Thesis Acceptance Form” signed by the members of the advisory committee signifies that the draft thesis has been read and is in appropriate form for the oral defense. The filing of a completed Tentative Thesis Acceptance Form signifies only that the student’s committee deems the thesis to be in acceptable form for oral defense. A student may expect that revisions, amendments, or additions may be required based upon the oral examination. In rare instances, serious difficulties may be discovered during the oral examination which result in major revisions in a thesis or dissertation. (Also see Section 10.3.8.)

10.2.3 Human Subjects Approval

GB 2/26/98

As required by The University of Maine policy, graduate students who plan to perform research that involves the use of human subjects must comply with The University of Maine Policies and Procedures for the Protection of Human Subjects of Research. No research with human subjects shall be conducted until a unit review committee has reviewed the research protocol and determined that the project is exempt from further review, or until the Protection of Human Subjects Review Board (HSRB) has approved the research protocol. Responsibility for ensuring compliance with The University of Maine Human Subjects Review Policy rests with the student’s thesis advisor. Evidence of HSRB approval, if applicable, must be noted on the student’s Final Thesis Acceptance Form. Student violations of the Human Subjects Review Policy will be handled on an individual basis in accordance with existing University of Maine or college/departamental policy. The inclusion in a thesis or dissertation of data involving human subjects which was obtained through procedures which did not receive prior approval by the HSRB will ordinarily not be permitted.

10.2.4 Animal Subjects Approval

GB 2/26/98

Graduate students performing research or testing using live vertebrate animals must obtain the approval of the Institutional Animal Care and Use Committee (IACUC) before initiating such studies. Responsibility for

ensuring compliance with The University of Maine Policies and Procedures for the Humane Care and Use of Animals rests with the student's thesis advisor. Evidence of IACUC approval, if applicable, must be noted on the student's Final Thesis Acceptance Form. Student violations of the Policies and Procedures for the Humane Care and Use of Animals will be handled on an individual basis in accordance with existing University of Maine or college/departmental policy. The inclusion in a thesis or dissertation of data involving animal subjects which was obtained through procedures which did not receive prior approval by the IACUC will ordinarily not be permitted.

10.3 Form and Preparation of Thesis FGS 6/9/55

As a general reference, the faculty adopted Campbell, W.G. and S.V. Ballou, *Form and Style: Theses, Reports, Term Papers*, Boston, Houghton Mifflin Co. 4th Ed., 1982, as a guide for graduate thesis writing at The University of Maine. It is expected that each department will guide its own students in the selection of the particular portions of the manual to be used in order that students will have experience with accepted practice in their own fields. The guidelines are available from the Graduate School's website at <http://www.umaine.edu/graduate>.

CAUTION: Do not consult another thesis for guidance. Thesis requirements change.

10.3.1 General FGS 10/13/66

The original copy of the thesis shall be on bond paper of 16 to 20 pound weight containing 25% or more rag content.

All copies of the thesis must be produced dark enough and clear enough to be easily readable. In general, equations and formulas should be typed (consult thesis committee). The type must not be smaller than 10 point.

The thesis must be standard, double-spaced throughout, except for quotations, footnotes, bibliographies, and illustrations, which may be single-spaced.

Each page of the thesis shall have a margin of at least one and one-half (1½) inches on the left and at least one (1) inch on the right. The top and bottom margins shall also be at least one inch. The only matter which may be outside these imaginary margin lines is the page number. All pages are assigned page numbers. Small Roman numerals are used for the preliminary pages following the title page. The title page is the only page in the thesis on which a number is not typed but is considered page "i." (Exception: The Library Rights Statement and Abstract are not included in the

pagination of the thesis.) Beginning with the first page of the text, all pages, including any appendices, are numbered consecutively with Arabic numerals.

10.3.2 Format

The order of presentation of the various parts of a thesis shall be as follows:

- Title Page
- Copyright Notice (optional)
- Library Rights Statement
- Abstract
- Dedication (if any)
- Acknowledgments (if any)
- Table of Contents (see below)
- List of Tables (if any)
- List of Figures (if any)
- Introduction (if any)
- Text of Thesis
 - By Chapter or by Section (consult committee)
- Bibliography or References Cited (consult committee)
- Appendix or Appendices (if any)
- Biography of the Author

The Table of Contents shall be a complete listing of all parts or divisions of the thesis that have page numbers including those pages numbered with Roman numerals.

10.3.3 Inserted Materials

Pages should not vary from standard size of the thesis paper. Most materials can be reduced to meet this specification. If reduction is not possible, then the fold should be such that it will not be trimmed in the binding process. All inserted materials, including graphs, diagrams, photographs, and supplementary materials included in the body of the thesis, must be on paper of comparable quality to that which meets specifications already described. Rubber cement or a dry mounting process may be used for mounting materials within the thesis. No other mounting method is acceptable.

10.3.4 Title Page

EC 5/4/61

The arrangement of the title page must follow a specific form. Samples of title pages for the master's thesis and for the doctoral dissertation may be obtained from the Graduate School.

10.3.5 Number of Copies

FGS 6/6/63

The candidate must prepare a minimum of three (3) copies of the thesis. The original is for eventual deposit in the University Library. The first copy shall be the property of the department in which the thesis was done. The second copy shall be the property of the student. Additional copies may be required by the advisor, or by agencies contributing to the financial support of the thesis project.

10.3.6 Biography

The biography shall be written in the third person and should not exceed one hundred fifty (150) words in length. It should give such information as the place and date of birth, education, major and minor fields of study, business or professional experience, exhibits of creative work, scholarly publications, and membership in professional organizations and honorary societies.

10.3.7 Abstracts

The candidate should prepare one (1) copy, in addition to the original, of an abstract of the thesis. Specifications for paper for each copy are identical to those for the thesis.

10.3.7.1 Master's Abstract

Two (2) copies of the master's abstract must be prepared. The abstract of the thesis shall consist of no more than five hundred (500) words. Both copies should be submitted with the thesis.

10.3.7.2 Doctoral Abstract

Three (3) copies of the doctoral abstract must be prepared. The maximum length for doctoral abstracts is three hundred fifty (350) words to comply with the requirement of ProQuest Information and Learning.

The name of the thesis advisor is to be included on the abstract, just below the title.

10.3.8 Date of Presentation

FGS 1/19/56; GB 11/17/77

The thesis should be in the hands of the thesis advisor about one (1) month prior to the anticipated date of the final oral examination, or at some time specified by the department concerned. The thesis, in a form acceptable for examination purposes, must be delivered to the Graduate School no later than 24 hours prior to the final oral examination and must be accompanied by a completed and signed Tentative Thesis Acceptance Form. The thesis shall be presented, unbound, in a manila clasp envelope with an additional title page pasted or glued on the outside of the envelope.

The requirement that the thesis be in a form acceptable for examination means that:

- a. it represents the finished scholarly product of the candidate's research, and
- b. all copies submitted be typed and properly organized, ready for final revisions.

The original of the thesis in its final approved form must be deposited in the Graduate School no later than six (6) days before classes end in the semester or summer session in which the student expects the degree to be awarded. The exact date and time the thesis is due is available in the Graduate School.

10.4 Microfilming

FGS 10/27/60

Microfilming of the doctoral dissertation, at the student's expense, is required. Copies of the agreement between the student and ProQuest Information and Learning, are available in the Graduate School. Doctoral candidates should obtain copies while the thesis is in preparation, and should submit completed agreement forms and fee to the Graduate School.

10.5 Credit Allowed for Thesis

FGS 6/21/45, 11/6/56

The minimum credit allowed for the master's thesis is six (6) hours but in no case may it exceed fifteen (15) hours. If more than ten (10) semester hours are allowed, at least two (2) academic years must be spent by the candidate in resident graduate study.

10.6 Library Rights Statement
FGS 6/6/63

The following signed statement, CENTERED on a separate unnumbered sheet, shall accompany the original copy of the thesis:

In presenting this thesis in partial fulfillment of the requirements for an advanced degree at The University of Maine, I agree that the Library shall make it freely available for inspection. I further agree that permission for “fair use” copying of this thesis for scholarly purposes may be granted by the Librarian. It is understood that any copying or publication of this thesis for financial gain shall not be allowed without my written permission.

Signature:

Date:

10.7 Publication of Research Results Prior to Acceptance of Thesis or Dissertation
FGS 1/11/68; GB 9/23/71

If work constituting the basis of a student’s thesis or dissertation is to be published and if publication will be prior to the acceptance of the thesis or dissertation, such publication shall be done only with the knowledge of the student’s committee and the mutual consent of the student and the thesis advisor. The work intended for inclusion in the thesis or dissertation normally should have been completed in major part after the program of study, including the research area, and has been defined by the student and his/her committee. The publication should identify the student author or authors, and should indicate that the work published is being done as part of his/her (their) thesis requirements for the master’s or doctoral degree at The University of Maine.

10.8 Lay Abstract
GB 10/18/90

Each Ed.D. and Ph.D. dissertation, when submitted in its tentative form to the Graduate School, must be accompanied by a brief (no more than three hundred fifty (350) words) abstract describing the candidate’s work in language suitable for a lay audience. The lay abstract may be bound with the dissertation at the

student's request. The Graduate School may submit this abstract for publication in newspapers, magazines, and other media of interest to the general public, and it may be used in selecting nominees for regional and national competitions.

11. FOREIGN LANGUAGE REQUIREMENT

Beginning on July 1, 1968 each institutional unit will designate its foreign language requirements, if any, and will specify the method of testing. Such requirements must be stated in the catalog description of the institutional unit. There is no overall Graduate School language requirement.

12. ACADEMIC COMMITTEES

12.1 Program or Advisory Committees

FGS 6/4/64

See Section 8.2.

12.2 Institutional Unit Graduate Committee

FGS 3/25/64, 4/27/70

Each institutional unit of the University offering a program leading to an advanced degree shall have a unit graduate committee. The department chairperson shall be an ex officio member of this committee. With this one exception, the size of the committee, the method of selecting members, and the general range of its functions will be determined by the Graduate Faculty of the institutional unit. The unit graduate committee is primarily the executive committee of the Graduate Faculty of the institutional unit. It carries on routine operations related to graduate work and proposes improvements in such for consideration by the unit. It coordinates graduate work in the unit, assists members of the Graduate Faculty and represents the unit in performing certain specific functions¹ related to operations of the Graduate School as designated in the Graduate Catalog or in the Policies and Regulations of the Graduate School. The institutional unit graduate committee does not replace the graduate faculty member in directing the work of graduate students.

¹Examples: Recommendations concerning admissions; general content of program of study; unit policy in regard to graduate study; guidance of student for first registration.

13. GRADES AND REPORTS

13.1 Grade Level Required

FGS 12/8/66, 4/27/70; GB 3/20/75

The work described in the student's program of study, presented for a graduate degree (exclusive of thesis), must be passed with a minimum grade of C. A grade of C will not carry graduate degree credit unless a student's advisory committee recommends and the Dean of the Graduate School approves that such credit be allowed. No student will be allowed to apply more than six (6) hours of C grades toward meeting the requirements of a Master's degree nor more than twelve (12) hours toward satisfying the requirements for a Ph.D. or Ed.D.

GB 4/28/83, 3/26/98, 10/31/02

Once an advanced degree has been awarded, grades in course work taken towards that degree cannot be changed. Incomplete grades, unless made up during the period before the degree is awarded, will remain as I's on the student's transcript. Each department offering a course may establish additional criteria for alteration of an incomplete grade. A student may not carry more than three incomplete grades in all enrolled degree programs without permission of the graduate program coordinator(s) and the Graduate School.

13.1.1 Evaluation Procedures

AFFIRM 7/1/97

It is presumed that a graduate student, whose preparation for a given course is adequate, will normally be able to earn a minimum grade of B. Whenever a student receives a grade lower than B, his/her advisory committee must make a written report and recommendation to the Dean of the Graduate School.

13.1.2 Reports

The reports referred to above are to be made on forms supplied by the Graduate School.

Reports shall be presented to the Graduate Faculty, from time to time, on matters relating to academic standards in the various disciplines.

13.2 Completion of Requirements

GB 12/86; GS 9/1/97, 10/01/02

Each graduate student is responsible for submitting to the Graduate School a "Completion of Requirements" form signed by his/her advisor or advisory committee, as appropriate. This form must be submitted no later than four (4)

weeks from the end of classes for the semester. A graduate degree is not completed until both of the following conditions are met:

- a. the necessary signatures are obtained on the Completion of Requirements form indicating that the student has satisfactorily passed a required oral examination, and
- b. the unit Graduate Coordinator has audited the student's official record and has signed this form indicating that all requirements for the degree have been fulfilled.

13.21 Doctoral Candidate Attendance at Commencement GB 5/14/81

No doctoral candidate shall be allowed to participate in a commencement exercise and/or recognition ceremony until he/she has successfully completed all requirements for the degree (including defense of his/her dissertation and filing of the completed final copy of the dissertation with the Graduate School).

13.22 Policy on Posthumous Doctoral Degrees GB 2/24/05

Preamble: The University of Maine ordinarily awards undergraduate and graduate degrees only to those candidates who have completed all course work and other requirements necessary to earn the degree. However, given the somewhat extended nature of a graduate student's dissertation preparation, occasions may arise in which a student passes away just prior to completing the final doctoral degree requirements. This policy permits the University of Maine to confer a doctoral degree to a deceased graduate student who has been admitted to candidacy and has completed all work except submission of the final dissertation, and who would likely have finished the remaining degree requirements within a year of the death.

Procedure: Upon receiving signed approval from the student's dissertation committee, the graduate program coordinator and/or department chair forwards a nomination letter to the Dean of the Graduate School expressing support for the conferral of the posthumous doctoral degree. The letter should address how close the student was to completing the dissertation at the time of his/her death. The nomination packet should also include the student's C.V. and may also contain letters of support from other faculty members. The Dean of the Graduate School will confer with the Executive Committee of the Graduate Board about awarding the degree posthumously. If the review is favorable, the Dean will forward a recommendation to the Provost and the President that the doctoral degree be conferred

posthumously. The President will then inform the Vice Chancellor for Academic and Student Affairs of the University's decision.

14. ACADEMIC APPEALS PROCEDURE

GB 2/19/82; AFFIRM 7/1/97; GB 2/1/01, GB 2/24/05

Recognizing the highly individualized nature of graduate programs, a student filing an academic appeal is encouraged to request that his/her thesis advisor or other faculty member of his/her choice act as a counselor and/or representative at any level of the appeal process which is as follows:

- a. The student should discuss the concern with the appropriate faculty member(s).
- b. If the concern persists, the student should follow the department's written appeal procedures if they exist, or if not, consult with the graduate program coordinator or chairperson/school director, (or the college dean, if there is no department).
- c. If the complaint remains unresolved, the student should write to the Dean of the Graduate School outlining the situation, and requesting a review. The Dean of the Graduate School or his/her designee will discuss the situation with the college dean and/or appropriate members of the department or graduate program. The Dean of the Graduate School or his/her designee will then meet with the student and attempt to resolve the problem.
- d. If this resolution is not satisfactory, the Dean of the Graduate School will refer the appeal to the Executive Committee of the Graduate Board for one final review. After hearing from the student and the faculty member(s) involved, the Executive Committee will render its decision, which shall be considered binding. The decision will be communicated to the student in writing by the Dean of the Graduate School.

15. FINANCIAL AID

Students classified in conditional or non-degree categories of admission are not eligible for award of scholarships, fellowships, or traineeships nor should they ordinarily be recommended for appointment as Graduate Assistants.

15.1 Definition of Terms

15.1.1 Graduate Assistant

A graduate student who receives compensation in return for required services in connection with research, instruction or instructional duties, including grading papers, assistance with laboratory sections, etc.

15.1.2 Graduate Fellow

A graduate student who has received an award for which no specific services are required, although the holder may be expected to pursue research or study in connection with an advanced degree.

15.1.3 Graduate Trainee

A graduate student supported by a grant program designed to increase the supply of trained scientific personnel. Funds are granted to the institution to encourage advanced study and research in broad areas of science. Research is required insofar as research is a requirement of the advanced degree program in which the student is enrolled.

15.2 Assistantships

GB 11/15/88, 10/31/02

Assistantships are available in most departments offering work leading to an advanced degree. The awarding of such assistantships is the responsibility of the department concerned but is contingent upon admission of the applicant to graduate study. Visiting graduate students in good standing in an approved program of study may be awarded assistantships. Graduate Assistants may not be appointed for more than half-time (twenty (20) hours of service per week) during the academic year. Graduate Assistants, although appointed through the professional payroll system of the University, do not accrue vacation or sick leave. To avoid misunderstandings, duties during the semester, any assignments during student holidays, and any other expectations should be defined by the faculty member, or the department to whom the graduate assistant reports. Graduate Assistants may not normally be employed in any other capacity by their department or by other units of the University.

15.2.1 Rate of Compensation

The rate of compensation depends upon:

- a. Qualifications of the applicant;
- b. Responsibilities involved; and
- c. Proportion of time devoted to University work.

15.2.2 Waiver of Tuition

P 11/25/69

Tuition for registration during the Summer Session will be waived for those students who have appointments as graduate assistants. This waiver is effective as of June 15, 1970 and in special cases, a limited amount of tuition for the summer following the academic year in which the appointment as a graduate assistant is effective may be paid by the Graduate School.

15.2.3 Additional Employment

GB 10/22/92

Graduate students may not be appointed to more than the equivalent of one (1) full-time (twenty (20) hours per week) graduate assistantship. Students holding a full-time graduate assistantship may not be otherwise employed concurrently at The University of Maine.

15.3 Student Aid

Nomination forms for fellowships, assistantships, and scholarships are made on forms available from the Graduate School. Nominations are due in the Graduate School in time for consideration at the March meeting of the Executive Committee.

15.3.1 University Graduate Research Assistantships

The Graduate School has a number of University Graduate Research Assistantships which provide a stipend plus tuition. These awards are normally held on a nine-month basis and are available to all students enrolled in thesis programs. Recipients are required to enroll on a full-time basis.

15.3.2 New England - Atlantic Provinces Fellowship
FGS 5/17/66

Fellowships are held by either Canadian or American students for graduate work at The University of Maine in the field of regional studies on New England and/or the Atlantic Provinces of Canada. Preference will be given to students with programs of a cross-border nature. The awards process is administered through the Canadian American Center.

15.3.3 Supplementation of Stipends Paid to Trainees or Fellows
Deans 5/29/67, 11/4/68, 10/20/89

Permission to supplement the stipend of a Graduate Fellow or Graduate Trainee may be granted by the Dean of the Graduate School.

15.3.4 Trustee Tuition Scholarships

Eighteen (18) scholarships, of the value of a year's tuition, have been established and are available for award to any graduate student in the University. Two (2) of these awards are made available to qualified U.S. citizens from groups that have been traditionally under represented at The University of Maine as Thurgood Marshall Scholarships.

15.3.5 Atlantic Provinces Graduate Scholarships

Three (3) graduate tuition scholarships are available annually to graduates of the colleges and universities of the Atlantic Provinces and Québec who are admitted to graduate study at the University.

15.4 Loans

Loan funds are available from several sources. Application for such aid should be made to the Student Financial Aid Office.

16. TUITION

Tuition rates for graduate students are established by the Board of Trustees.

17. GRADUATE SCHOOL CATALOG

The Graduate School will publish a catalog which will include: members of the Graduate Faculty; pertinent items of information concerning graduate study; and a listing of those courses which are acceptable for graduate credit.
